E D U C A T I O N

Bachelor of Science in Information Technology

- Ramon Magsaysay Memorial Colleges – Marbel Inc.
  2014 - 2018
- Notre Dame of Suralla
  2010 - 2014
- Tubiala Elementry School
  2006 - 2010

S K I L L S

- Experience with Laravel and Php development project
- Git, Git Flow and Linux Command
- Dockerize Platform
- Meeting deadlines
- Experience working using Frontend tech stack - VueJs and Angular
- State management such as VueX and Pinia
- Aws Instance Project Deployment

P R O F I L E

An experienced Software Engineer with a strong focus on Web Development. Expertise includes developing Static Web Apps, E-commerce websites, Admin Page Platforms, and API-based web applications. Dedicated to building scalable and high-performing web solutions that drive user engagement and business growth.

E X P E R I E N C E

Full stack developer

- Truckit.net Pty Ltd | Toowong AQL 4066, Australia
  July 2023

  - Engineered the business use section of the web app, facilitating efficient booking navigation through advanced table management features.
  - Utilized Angular for front-end development and Laravel for backend API integration, ensuring seamless data flow and system interoperability.
  - Integrated the common use section (monolith) with the business use section by optimizing data retrieval processes, reducing latency by directly querying the database when appropriate.
  - Collaborated with backend developers to implement API calls between the monolith and Laravel backend, enhancing the application's functionality.
  - Added new features to the front-end, including AG Grid tools for enhanced data manipulation and visualization, and instant booking capabilities to streamline service matching between providers and customers.
  - Continuously improved the user interface to provide a seamless experience for both business users and general customers, ensuring high usability and responsiveness.
  - Conducted code reviews, debugging, and testing to maintain high standards of code quality and application reliability.
  - Worked closely with cross-functional teams to align development efforts with business objectives and user needs.

PROJECTS INVOLVEDWITH AS FREELANCER

iVolunteer Philippines

- iVolunteer was then created to provide volunteers an easy way to find volunteering opportunities that match their skills, interest, and advocacy, while also using the same platform to help organizations thrive and find volunteers that match their needs.

Software Engineer

- Virtual CMD Staffing | Quezon City, NCR, Philippines
  January 2023 - August 2023

  - Developed and maintained API-based backend services using Laravel to support a web app PDF editor, enabling users to add text, draw, and insert images into existing PDFs.
  - Collaborated with front-end developers to ensure seamless integration and functionality of new features within the existing project framework.
  - Enhanced application security by implementing robust authentication and authorization mechanisms, protecting sensitive user data and maintaining compliance with industry standards.
  - Integrated third-party services to extend the app's capabilities, ensuring smooth data flow and interoperability between systems.
  - Designed the backend architecture to be plugin-able, allowing for easy integration of the PDF editor into other projects or web applications.
  - Conducted thorough testing and debugging of APIs to ensure high performance, reliability, and scalability of the backend services.
  - Provided technical documentation and support to facilitate the integration and usage of the API by other developers and teams.
  - Worked closely with project managers and stakeholders to understand requirements and deliver solutions that meet business objectives and user needs.

Backend Developer

- **Highly Succeed Inc.** | Mandaluyong, NCR, Philippines
  February 2021 - January 2023

  - ·Developing and maintaining RESTful APIs using the Laravel framework, alongside tools like Postman and SQL, to facilitate efficient data exchange and communication.
  - ·Ensuring thorough documentation of APIs, focusing on security, scalability, and ease of use for both internal and external clients.
  - ·Proactively troubleshooting and debugging API-related issues, providing timely technical support to address any challenges.
  - ·Collaborating closely with frontend developers and other backend team members to seamlessly integrate APIs into web applications and services, ensuring smooth functionality and user experience.
